

Multi Action Mix

What are they?

A bucket-load of adrenaline-fuelled activities to form the basis of, or enhance any event.

The supreme energiser or incentive day; guests get to experience activities that would knock the socks off a sumo wrestler! Whether it's taking control of fifty tonnes of military might or hurtling round a bend in a 400cc buggy, everybody's primal need for speed and excitement can be catered for during a Multi Action Mix day.

How do they work?

Guests are split into teams and rotate around various activity zones, with fun money or points able to be awarded depending on team performance in each zone. Our expert instructors will introduce guests to each activity, and after a short demonstration or briefing it will be the guests' turn to have a go!

Create the ultimate action experience. The activity range is vast, allowing you to pick and mix activity zones according to your audience and requirements.

The Choice of Action

Abbott Tanks

If you've got 17 tonnes of metal mounted onto caterpillar tracks, you're probably going to have a fair bit of fun. Fast and with effortless steering, teams will experience the zippiest tank ride going! There's even an option to run over a car in it!

Argos

Guests can speed easily across unforgiving landscapes in Argocats. These 6 wheeled semi amphibious machines are used as reconnaissance vehicles by the Canadian army. Able to cross any off-road terrain, they demand a high level of co-ordination and control.

Blind Driving

Highly dangerous on the M25, but safe in the middle of a field. Team members take it in turn to "navigate" one of their colleagues, who will be driving a 4x4 vehicle blindfolded, around a course. Effective at building communication and trust between colleagues, and a great laugh to boot!

Chieftain Tank

This is a monster of a machine. With 55 tonnes of armoured might, this tank is able to tackle rough terrain effortlessly and shows no mercy to anything in its path. Perhaps you may want to perform a car-crushing finale in it? No problem.

Close Quarter Battle

Known to the rest of us as Paintballing, Close Quarters Battle sees two teams take part in a variety of high excitement combat games. Trying to avoid being hit by paint pellets fired from compressed air guns, the budding soldiers can take on missions including capture the flag, Hostage rescue and search and destroy. For a less tactile alternative, see Outdoor Laser Tag below.

Multi Action Mix

Ferrett Armoured Cars

Another army favourite - I use one of these to do my weekly shop. Nippy, responsive and with an unusual driving position, Ferrets are great fun to drive in deep mud.

Finesse Driving

It's fair enough being able to race around at full speed, but that's no good if you lack sufficient driving skills. With this activity teams can hone their handling capabilities. Using a 4x4 vehicle, various finesse driving tasks can be undertaken to gain points - including dribbling a giant ball around obstacle course.

Helicopter Search and Rescue

Teams take to the sky armed with map and clues in the ultimate aerial treasure hunt. Deciphering puzzles and tracking down waypoints, this is a high adrenaline chopper-based mission to find the final location in the quickest time possible.

Hostage Rescue Mission

With your inside man now being held by the enemy, it is up to you and the team to release him from the terrorists' grip. Experience the thrill of a rescue mission after being briefed by experts, and using authentic SO19 and SAS techniques, teams can devise a strategy and put it into the practice to pull off their daring mission.

Hovers

If ever you've dreamed of gliding through the air with the greatest of ease, these are for you. Hovers are single seater mini-hovercraft, able to travel over both land and water. By creating a thin cushion of air directly underneath the vehicle, Hovers allow drivers to travel at speed and steer through a specially designed course by moving their weight from side to side and using a rudder.

Ice Climbing

For an extreme physical challenge, look no further than climbing up a vertical face of ice! Team members take turns to strap on spiked boots, grab two ice axes and tackle the climb, after some hints and tips by our instructors. Performance in the climb can be awarded with points, but the exhilaration of the activity and sense of achievement to have reached to top of the wall will be enough for most!

Land Yachting

A strange hybrid sport which takes place on open, empty beaches. After assembling their vehicle, team members get to experience the elegance of sailing alongside the buzz of motor racing. Reaching speeds of up to 40mph, drivers find themselves only centimetres from the sand and use their vehicle's sail to manoeuvre.

Multi Action Mix

Mini Diggers

Testing dexterity and co-ordination, these are unusual and highly enjoyable machines. Teams can attempt to master the controls of a mini JCB for a variety of construction based tasks. Whether it's trench digging, distributing earth or building their own mud mountain, the budding site workers will have a wacky and thoroughly amusing mechanised experience!

Monster Trucks

Experience the thrill of riding in a 3m high, 4000kg customised truck. Whether it's driving effortlessly over a line of cars, jumping over mud ramps or simply speeding along flat land, these mechanical monstrosities offer a truly out of the ordinary motoring experience.

Outdoor Laser Tag

The timeless school-yard game gets a high adrenaline makeover as it fuses with the laser gun activity 'Quasar'. Each player has infra-red sensor pads attached to themselves, and with their laser gun attempt to shoot the opponents' sensors. Those who have been hit are 'tagged', and must then shoot another player to pass on the tag. Great fast and furious fun!

Pilots

With 400cc engines, these dune buggies are capable of reaching great speeds. Easy to drive due to their simple hand control system, Pilots can provide a mountain of rapid excitement with their ability to jump and corner briskly. Brush up on some driving skills, race against the clock with team mates, or simply rocket around an outdoor circuit!

Powerturns

Capable of spinning 360° on its own axis, the Powerturn is a dual-seater buggy powered by twin engines. A totally different driving discipline, they can power-slide around corners, perform doughnuts, wheelies and can probably manoeuvre faster than any other off-road leisure vehicle in the world. Tackle a demanding off-road course in them, or take part in a spot of Powerturn Snooker; attempting to hit large coloured balls in a certain order and in the quickest time.

Pulsar Laser Pod

An all-guns-blazing indoor version of Outdoor Laser Tag. Team members furiously battle it out inside a giant atmospheric inflatable pod, which is dimly lit and filled with smoke and sound effects. Aiming to score as many hits as possible, players dash around the inflatable to shoot their opponents' infra-red sensor pads. Will you have the aim, tenacity and tactics to come out on top?

Quads

Exciting off-road four wheeled motorbikes. Quads are simple to use and can be driven on almost any terrain. Teams are able to be scored on their performance along a Quad trail. Or why not have teams test their handling abilities to the limit with a Quad obstacle course?

Rage Buggies

As the name suggests, these machines weren't built for Sunday driving. Taking control of a single seater buggy, team members can use the 614cc engine to navigate around a circuit at considerable speed!!

Multi Action Mix

Rally Karts

With great cornering abilities and acceleration that make Usain Bolt look like an OAP, these traditional Go-Kart vehicles provide good old fashioned speed based excitement. The Rally Kart's model and tyre type mean they can be driven easily on grass and other off road surfaces, and can be used to race against the clock.

Reverse Steer Crazy Tractors

More vehicular based insanity! Using motorised seated lawn mowers, team members attempt to complete a marked out course. Easy? Far from it – these machines are built to bamboozle. With the Crazy Tractors steering in the opposite direction, teams will find themselves in a challenging and truly comical predicament!

SAS Skills

Teams receive special operations training. Professionals and former members of the SAS teach the budding soldiers how to live off the land and survive behind enemy lines. The art of camouflage is explained, as well as counter surveillance techniques, bomb disposal, field craft and unarmed combat. After a period of training teams can demonstrate what they have learnt during a simulated training exercise.

Segways

Amazing pieces of equipment, a Segway looks like a space age amalgam of a bicycle and a skateboard. These two wheeled, electric motor machines are manoeuvred by weight distribution and react to the slightest movement of a driver's body. With both street and off road versions available, teams can tackle a variety of different activities on the Segways.

Skydiving

If the term 'high-adrenaline' was found in an encyclopaedia, there would probably be a description of this activity. After climbing to a heady 15,000ft, you and an experienced instructor will jump from a plane and freefall for a minute at 120mph. After deploying your parachute, you will then both soar through the air for a further five minutes – offering you unparalleled views – before a comfortable landing. All it takes is 20 minutes basic training and a smidgen of courage!

Target Grenades

Using a replica training grenade, recruits hit a series of targets at various distances. A successful throw will detonate a battlefield pyrotechnic. As if that wasn't exciting enough, grenades are thrown from standing and prone positions after a crawl through a net tunnel.

Multi Action Mix

Who is it suitable for?

- All genders, organisations & business backgrounds
- Colleagues or clients
- Most effective for 40 or more people

Who is it suitable for?

- An exciting way for guests to meet
- A memorable and fun occasion
- A great way of rewarding hard working colleagues
- A perfect, energising incentive

Enhancements

- Make your day eclectic by adding in activities from our Country Pursuits Mix: for some slightly more relaxed enjoyment, try a spot of archery, clay pigeon shooting or axe throwing in between the motorised madness!
- Complement a Multi Action Day with a variety of collaborative tasks from our Mix and Match Teamwork Challenge selection
- We can provide prizes themed to each activity
- Round the event off with an action themed evening dinner; during which prizes and accolades can be awarded for the various performances of the day.
